DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 rejected under 35 U.S.C. 112, second paragraph, a broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 4 recites the broad recitation "the nanocomposite composition contains from 1 to 50 percent by volume", and the claim also recites "preferably from 1 to 30 percent by volume, of nanoparticles" which is the narrower statement of the range/limitation.

3. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite, the use of multiple "and/or" makes the claim indefinite because it is not clear which resulting combination of components is claimed.

Claim Objections

4. Claim 5 is objected to because of the following informalities: The expression "may be" makes it unclear if it is required for the radicals to be "aliphatic, aromatic and/or cycloaliphatic groups and Y is an inorganic or organic anion". For the purpose of the examination the expression "may be" is interpreted to mean "is not required". Appropriate correction is required. It is suggested that applicants amend the claims to better define the identity of the radicals.

5. Claim 14 is objected to because of the following informalities: The expression "preferably" makes it unclear if it is required for the plasma to contain "CHF₃/O₂" and "O₂". For the purpose of the examination the expression "preferably" is interpreted to mean "is not required". Appropriate correction is required.

Allowable Subject Matter

6. Claims 1-3, 7-13 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 1765

8. Regarding claim 1, the cited prior art of record fails to disclose or suggest a microlithographic arrangement comprising the particular layers and components in the manner described in the instant claim.

9. Regarding claim 9, the cited prior art of record fails to disclose or suggest a method for producing the allowable product of claim 1.
